Invitation til NJS-seminar

New National Travel Card in Denmark

”Rejsekort” is the national electronic ticketing system which can be used on all busses, trains, tram and metros in Denmark. Since 2016, it covers all Public Transport Authorities and railways in Denmark, except on the island of Bornholm. The system is based on a smartcard to check-in and check-out, i.e. you pay after the journey is completed. There are more than 2 million users. Recently the check-in/check-out procedure was made possible by on mobile phones with Rejsekortets app.

The next generation is under preparation. The new national Travel Card will be based on smartphones, but a solution for non-smartphone users will exist. In the webinar CCO Jens Willars, Rejsekort & Rejseplan A/S, will present Rejsekort and the next generation of the national Danish Travel Card.

Tid

Wednesday January 8, 2024, 16h00 –17h00.

Sted

Webinar (Teams)

Before the meeting, you will receive a link by e-mail for connection to the webinar
